MILL CERTIFICATIONS

ISO 9001 and ISO/TS 16949

Each PTC Alliance plant has a documented quality system, and third-party registered to the ISO 9001 or ISO/TS 16949 International Standards for Quality. The quality processes are aimed at achieving customer satisfaction through prevention of nonconformity through all key processes, from order entry through delivery of product to the customer. Some PTC Alliance plants are third-party registered to the ISO/TS 16949 Standard in order to meet the additional requirements of OEM automotive customers. These certifications demonstrate our commitment to customer satisfaction by establishing measurable objectives, identifying key organizational processes, continually improving process and product quality, and providing a framework for excellence.
